SUMMARY

Full-Stack Developer with 1.5 years of production experience building enterprise web and SaaS systems for F&B retail and sports management, using React, Angular, NestJS, and PostgreSQL. Delivered core workflows for a 36-branch F&B chain and a large multi-cluster pickleball platform. Also building ASP.NET Core systems (HRM, multi-tenant SaaS) as self-directed projects. Comfortable working in Agile teams.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, SQL, HTML5/CSS3
Frameworks & Libraries: NestJS, React, Next.js, Angular, React Native, ASP.NET Core, Tailwind CSS
Databases & ORM: PostgreSQL, MySQL, Supabase, TypeORM, Entity Framework Core
DevOps & Methodologies: Git, Docker, Postman, RESTful APIs, WebSockets, Agile/Scrum
AI-Assisted Development: Cursor, Claude (code review, refactoring, debugging)

EXPERIENCE

APETECH Solutions | *Full-Stack Web Developer* May 2025 – Oct. 2026

- F&B Retail (Americano, 36 branches):** Built purchase order, stock liquidation, item-locking, and audit logging workflows in React and NestJS, reducing inventory discrepancy risk and manual approval effort across branches.
- Sports Management (D-Joy Pickleball, 3 large court clusters in Saigon):** Built court booking and tournament bracket features for one of the largest pickleball venues in Southeast Asia; designed reservation logic to prevent double-booking under concurrent peak-hour traffic.
- PMS SaaS:** Designed multi-tenant data schemas, built reusable component libraries, and tuned PostgreSQL indexes for dashboard queries; delivered APIs across Agile sprints.

PERSONAL PROJECTS

SmartHRM – HR Platform | *.NET 9, Angular 19, React Native, PostgreSQL* | Jan. 2026 – Present

- Built a 3-tier HR system with **ASP.NET Core Web API**, **Angular 19**, and **React Native** (self-directed project for learning clean architecture).
- Implemented fine-grained **RBAC**, dynamic approval chains, and payroll calculation following shift and tax rules.
- Implemented **GPS mobile check-in** with geofencing validation to reduce fraudulent attendance.

WIO – Wedding Invitation SaaS | *Next.js 14, NestJS, PostgreSQL, WebSockets* | Mar. 2026 – Present

- Built a full-stack digital invitation platform with template customization, guest wishbooks, and VietQR gift integration; preparing for production deployment.
- Implemented **NestJS WebSocket gateways** for live RSVP confirmations and gift notifications on host dashboards.
- Used Next.js SSR and dynamic OpenGraph generation for fast mobile loading and rich link previews when shared.

ACTIVITIES

Faculty Student Executive Board | *Committee Member* Sept. 2023 – Sept. 2026

- Coordinated academic competitions and orientation events supporting more than 500 students.

EDUCATION

Saigon University Ho Chi Minh City, Vietnam
Engineer's Degree in Software Engineering (GPA: 7.5/10) Sep. 2022 – Oct. 2026

- Honors:** Academic Excellence Scholarships (2 semesters). **Coursework:** Data Structures & Algorithms, Database Management, Software Architecture.

INTERESTS

Building open-source tools, football, badminton, and music.
